

Orientation to Your Simulator

This two-hour virtual Orientation to your Simulator training will enable participants to identify and operate key simulator features for application in medical simulation. This training is instructor-led and delivered through virtual means and is primarily hands-on and interactive. Upon completion of this training, participants should possess the skill necessary to operate the simulator using a Theme, Scenario, and/or 'on-the-fly'.

Upon full participation and completion of this virtual training, participants will be able to:

- Identify and verbalize simulator system components
- Demonstrate system startup & shutdown procedures
- Identify and verbalize key features of the Simulator
- Operate the simulator using the SimPad or LLEAP Instructor Application

Pre-Training Agenda

Needs Assessment	30 – 45 Minutes
Introduction to Simulation	45 – 60 Minutes

2 Hour Virtual Instructor-Led Training Agenda

Welcome/Understanding System Components	10 Minutes
Simulator System Startup/Shutdown Procedures	20 Minutes
Simulator System Features	45 Minutes
Learning Application Software & Closing	45 Minutes

Educational Representative Responsibility

Your Laerdal Educational Representative has multiple responsibilities during the virtual training:

- Help you understand Laerdal resources.
- Conduct an interactive agenda to optimize your understanding of Simulation Strategies and facilitate the development of your proficiency in its operation.
- Facilitate discussions about how Simulation Strategies can meet your goals.
