

MamaBirthie is an anatomically accurate model which allows for realistic simulation and demonstration of both normal and complicated labor, focusing on the first two stages of labor. MamaNatalie focuses on complications and management of the third and fourth stages of labor.

	Simulation scenarios	MamaBirthie	MamaNatalie
Stage 1 & 2	Abdominal and vaginal examination	●●●	●○○
	Anatomical visualization of rotation at birth	●●●	○○○
	Fetal heart rate sounds	●●○	●●○
	Normal birth	●●●	●●○
	Shoulder dystocia	●●●	○○○
	Assisted breech delivery	●●●	●○○
	Vacuum assisted delivery	●●●	●○○
	Cord prolapse	●●●	●●●
Stage 3 & 4	Urinary catheterization	●●●	●●●
	Delivery of placenta	●●●	●●●
	Examining placenta, membranes, artery and veins	●●●	●○○
	Retained placenta	●●●	●●●
	Uterine massage	●●●	●●●
	Postpartum hemorrhage	○○○	●●●
	Uterine compression	●●○	●●●
Newborn resuscitation	○○○*	●●●	

	Features	BabyBirthie	NeoNatalie
	Palpable limbs	●●●	○○○
	Palpable fontanel	●●●	●●○
	Stretching neck	●●●	○○○
	Tilting head	●●●	●●●
	Rotating neck	●●●	●○○
	Head simulating chignon effect	●●●	○○○
	Breathing lungs	○○○	●●●
	Pulsating cord and heartbeat	○○○	●●●
	Open mouth for feeding positioning	●●●	●●●

\* BabyBirthie may be substituted by NeoNatalie post-delivery for simulation of complicated birthing scenarios that include newborn resuscitation.

# Birthing Simulator and Skills Trainer

MamaBirthie offers very unique features, yet it is significantly more affordable than other simulators. It is made of durable fabrics, requires no lubrication during use, and has passed durability test for 3000 deliveries.

In 2015, an estimated 300,000 women and 2.7 million newborns died from complications related to pregnancy or childbirth. (WHO2015)

WHO emphasizes the importance of skilled health professionals attending all births, as timely management and treatment can make the difference between life and death for both the mother and the baby. Only 51% of women in low-income countries benefit from skilled care during childbirth. (WHO2015)

Investing in well-trained midwives can save millions of lives each year. In Bangladesh, the training of 500 midwives reduced maternal mortality by over 80% and infant mortality by 75%. (State of the Worlds Midwife 2014)

## BabyBirthie

A realistic articulated newborn manikin with fontanels and anatomical landmarks to support training on different presentations and labor complications.

A chignon will appear after the use of the vacuum suction device, letting the learner assess the placement of the vacuum cup.

A sophisticated neck mechanism ensures that the head can be stretched, turned and tilted for practicing maneuvers for shoulder dystocia.

Instructional videos of how to setup the product and run simulations.

## Skills Trainer Mode

MamaBirthie can be used as a tabletop model to demonstrate the mechanics of birth and train skills including abdominal and vaginal examinations, vacuum assisted delivery and breech.

## Birthing Simulator Mode

MamaBirthie can be worn to facilitate realistic simulation scenarios including normal birth, different birthing positions and labor complications. It is also ideal for in-situ team simulation and training respectful care.

Female external genitalia with urethra, clitoris, labia and stretchable perineum.

Management of malpresentations including breech and shoulder dystocia can be trained on the table or in simulation mode.

Realistic fetal head, birth canal and pelvic floor facilitates natural rotation of the head as it descends.

Cervix inserts of 4, 6 and 8 cm dilatation and effacement, in addition to anatomical landmarks in the birth canal, allow for skills training on vaginal examination.
