sonosim[®]

Deliver High-Quality, Standardized Ultrasound Education with Real-Patient Pathology

SonoSim Starter Edition

The SonoSim Starter Edition provides a SonoSim-certified laptop pre-installed with the patented SonoSim Ultrasound Training Solution, forming the foundation to build your ultrasound training curriculum. Select either one of the preconfigured module bundles or add individual modules from over 60 medical topics. With SonoSim Performance Tracker, manage and track up to 50 learners in one seamless interface.

Visit Laerdal.com and SonoSim.com for more information.

The SonoSim Starter Edition allows up to 50 learners to move through the following three steps to acquire and develop their foundational ultrasound knowledge and skills in a safe, repeatable environment.

SonoSim Courses
Online didactic instruction

Didactics

- Peer-reviewed SonoSim Courses are developed by leading experts in ultrasonography and medical education
- The online courses are delivered in an interactive multimedia format using still and dynamic ultrasound imagery, audio narration, computer graphic imagery, and animation

SonoSim Knowledge Assessment
Built-In Q&A to measure proficiency

Knowledge Assessment

- Learners answer in-module knowledge assessment questions and complete a final MasteryTest upon course completion
- Hands-on training cases can be saved, annotated, and archived for performance review

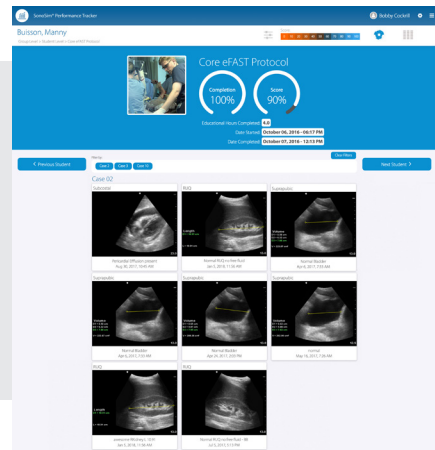

SonoSimulator®
Hands-on scanning cases

Hands-on Training

- Access on-demand scanning of real-patient cases and pathologies with the patented SonoSimulator
- Learners develop the key psychomotor skills that replicate the exact tactile experience of using an actual ultrasound probe to scan a real patient

The SonoSim Starter Edition comes with 5 years access to SonoSim Performance Tracker allowing the administrator to assign modules to learners and then track, monitor and review performance and submitted content through one seamless interface.

Ordering Information

Part No. 390-00500

Description: SonoSim Starter Edition

Included:

- SonoSim Ultrasound Training Solution pre-installed on a SonoSim-certified laptop
- 1 SonoSim Probe
- 1 hard-shell protective carrying case
