

Educational Services

# Laerdal Services Solution

## Getting Started Courses

This one day course for up to eight participants is delivered at your facility by our Field Service Specialist or Educational Service Specialist.

Learn the basics of your simulator including startup and shut down procedures, how to run basic scenarios, patient monitor and instructor device operations, operating modes, and other useful system features. Hands-on activities will help your team become familiar with the simulator and how to run a basic scenario. The course is aimed at those who will be responsible for running simulations.

### Available courses:
